

UPM Timber – We renew the everyday

Build your business sustainably with renewable materials – and with us

UPM Timber

Your number one choice for sustainable timber

Regardless of your needs and requirements, we have the right sawn timber for you. Our professionals turn responsibly managed forests into carbon-storing, safe and pure products with minimal emissions.

Your success is our number one priority. That is why we are dedicated to support you in developing more sustainable products for your customers. You can count on us to supply you with sustainably produced timber with the right quality, at the right time.

Ready to find your timber?

UPM Timber is leading the way to a fossil free future

We are helping you with:

Sustainable timber

- UPM plants globally 100 trees per minute.
- The origin of the raw material is 100% traceable.
- Minimal emissions from forest to package – we use fossil-free energy in our sawmills' production.
- UPM value chain uses the whole tree, and nothing goes to waste.

Long-term partnerships

- UPM Timber's longest customer relationship span five decades.
- We want to support our customers to succeed – we succeed alongside our customers.

Product and service quality

- A broad portfolio of pine and spruce timber for various end uses.
- High-quality Finnish raw material enables consistent product quality.
- Professional sales team serves personally and locally around the world.
- Terminal warehouse and consignment stock operations in selected markets.

Reliability

- We deliver what we promise.
- We constantly develop our versatile logistics network to ensure reliable deliveries to our customers around the world.

Find your timber

Our comprehensive product range opens a new world of possibilities. Find the right timber and quality specifically for your needs.

Our sustainably produced raw material and skilled staff enable us to produce high-quality sawn timber meeting customer requirements.

UPM Timber's product range covers both standard and special sawn timber made of Finnish redwood and whitewood. Our standard sawn timber product range offers you a huge variety of options for versatile end-uses. If you have additional dimension and moisture content requirements, we also design and manufacture special sawn products, particularly for joinery and furniture industries.

A sustainable choice

We use only high-quality Finnish pine and spruce that can always be traced to its sustainable origins. All our sawmills in Finland comply with the latest production standards and have the PEFC /02-34-05 and FSC™ C086359 chain of custody certifications. Every product leaving our sawmills is produced with renewable energy. We are also committed to continuously reducing our logistics related emissions.
