

UPM Timber – SETTING THE STANDARD

Move beyond fossils with sustainable timber.

UPMTIMBER

Your number one choice for sustainable timber

Regardless of your needs and requirements, we have the right sawn timber for you. Our professionals turn responsibly managed forests into carbon-storing, safe and pure products with minimal emissions.

Your success is our number one priority. That is why we are dedicated to support you in developing more sustainable products for your customers. You can count on us to supply you with responsibly produced timber with the right quality, at the right time.

UPM Timber is leading the way to a fossil free future

We are Setting the Standard in

SUSTAINABLE TIMBER

- UPM plants 100 trees per minute – four for every tree felled.
- Industry's lowest emissions from forest to package. UPM Timber uses only fossil-free energy in our sawmills' production.
- We use the whole tree, nothing goes to waste.

LONG-TERM PARTNERSHIPS

- UPM Timber's longest customer relationship span five decades.

PRODUCT AND SERVICE QUALITY

- UPM Timber's products excel in all end-use segments.
- Our professional sales team offers personal service worldwide.

RELIABILITY

- Top of the class logistics ensure reliable and efficient deliveries.

Find your timber

Our comprehensive product range opens a new world of possibilities. Find the right timber and quality specifically for your needs.

We use certified raw material and latest sawmilling techniques to produce high quality sawn timber that fulfils the highest customer requirements.

The product range covers both standard and special sawn timber made of Finnish redwood and whitewood. Our standard sawn timber product range offers you a huge variety of options for versatile end-uses. If you have additional dimension and moisture content requirements, we also design and manufacture special sawn products, particularly for joinery and furniture industries.

A SUSTAINABLE CHOICE

We use only high-quality Finnish pine and spruce that can always be traced to its sustainable origins. All our sawmills in Finland comply with the latest production standards and have the PEFC /02-34-05 and FSC® C086359 chain of custody certifications. Every product leaving our sawmills is produced with renewable energy. We are also committed to continuously reducing our logistics related emissions.
