UPM Korkeakoski sawmill

Korkeakoski sawmill produces redwood sawn timber from certified Nordic pine. The annual production capacity of Korkeakoski sawmill is 330,000 m³ of sawn timber. More than two thirds of the production volume is exported. The main export markets are United Kingdom, Middle East and North African countries.

As raw material Korkeakoski sawmill uses 100% domestic pine purchased mainly from the nearby area forests. UPM is committed to sustainable forest management and forestry methods based on internationally accepted principles.

Currently 70 employees are directly employed by UPM Korkeakoski sawmill and in total 90 people are working in the sawmill area. Sawmill's history is dating back to 1960 when the sawmilling operations started in Korkeakoski. The sawmill has been modernized in various stages and the most significant investment in recent years was the new bio heating plant established in 2013.

UPM Korkeakoski sawn timber is used in the joinery industry for window frames in the UK.
