WELCOME TO UPM Seikku sawmill

UPM – the Biofore Company

UPM leads the integration of bio and forest industries into a new, sustainable and innovation-driven future. The company UPM consists of six business areas: UPM Biorefining, UPM Energy, UPM Raflatac, UPM Paper Asia, UPM Paper ENA (Europe & North America) and UPM Plywood. Our products are made of responsibly sourced, renewable raw materials. They offer alternatives to replace non-renewable fossil-based materials.

UPM's turnover is about EUR 10 billion. UPM has production plants in 13 countries and a global sales network. Our 20,000 people work in 45 countries across six continents. UPM shares are listed on the NASDAQ Helsinki stock exchange.

UPM Seikku sawn timber ST-quality sideboards are being further processed in China to different kind of furniture.

UPM Seikku sawmill

Seikku sawmill produces whitewood sawn timber from certified Nordic spruce. The annual production capacity of Seikku sawmill is 390,000 m³ of sawn timber. More than two thirds of the production volume is exported. The main export markets are Central Europe, Asia and Middle East – North African countries.

As raw material Seikku sawmill uses 100% domestic spruce purchased mainly from the forests of Western Finland. UPM is committed to sustainable forest management and forestry methods based on internationally accepted principles.

Currently 80 employees are directly employed by UPM Seikku sawmill and in total 120 people are working in the sawmill area. UPM Seikku sawmill has a long history dating back to 1872 when Fredrik Wilhelm Rosenlew set up the sawmill in Aittaluoto. The sawmill has been modernized in various stages and the latest investment was a modern high capacity log sorting line in summer 2015.
